YOUR SAFETY DEPARTMENT, LLC ANNOUNCES PEC SAFELAND, PEC H2S CLEAR AND PEC PIPELINE ONLINE CLASSES VIA INSTRUCTOR LED DISTANCE LEARNING.

PEC Safeland, PEC H2S Clear and PEC Basic Pipeline Online Learning

APRIL 10th, 2020, (San Antonio, Texas) – **Your Safety Department, LLC** is pleased to announce that we have been approved to deliver PEC SAFELAND, PEC H2S CLEAR and PEC BASIC PIPELINE in an Instructor Led Distance Learning Format during the current emergency pandemic and in response to social distancing guidelines related to COVID19.

The **PEC Basic Orientation / SafeLand USA** safety awareness course is designed to take the place of multiple Operator orientations and to give each student a general idea of life and safety issues in the oil and gas industry, upstream, downstream onshore. This one-day program meets OSHA, and almost all Major and Mid-Major Operators in and outside of the USA, requirements and provides a basic understanding at an awareness level of certain general safety information that an employee should know before entering a company facility and while performing their assigned work duties.

PEC H2S Clear is the most comprehensive training program available on the deadly threat of hydrogen sulfide across the country and was developed to improve employee safety for general industry workers. The program has become the preferred H2S training program of multiple owner clients and operators for adoption by their employees and contract workers to be eligible to come on-site.

PEC Basic Pipeline is an introductory orientation course that covers both Safeland requirements and Pipeline specific hazards and mitigation. This course covers awareness level safety information in order to ensure standardized basic safety principles across all levels of pipeline employees.

Chris Thuneman, President of Your Safety Department states, “We are excited to continue adding quality safety programs to our service capabilities in order to support our customers and their employees with programs designed to enhance their safety awareness and training. These courses are essential to the safety of personnel working in the oil and gas sector both onshore and offshore and everyone will benefit from the material learning that is offered.”

About Your Safety Department, LLC

Your Safety Department is a privately held, safety solution services company for the oil, gas, chemical, power, mining, construction, and general industries segments and provides its services in the continental United States. Your Safety Department also provides both onsite and online services including safety staffing, outsourced safety, respirator fit testing, drug and alcohol testing, safety training, and written programs all designed for seamless implementation into existing safety management systems.
